About me:

I'm a frontend web developer with a demonstrated history of working in the software engineering industry for over 7 years. I love working on projects, converting ideas and UI's to functional web applications, and enjoy doing the front-end part where I use my skills in user interface design. I create websites and web apps using javascript, typescript, and their frameworks.

● WORK EXPERIENCE

08/2022 – CURRENT Remote, Sweden
SENIOR FRONTEND DEVELOPER PROXIFY - HTTPS://PROXIFY.IO/

09/2022 Paris, France
SENIOR FRONTEND DEVELOPER KANJI - HTTPS://WWW.KANJI.IO/

- Worked on the Kanji web3 SaaS platform
- Responsible for all things Front-end related
- Developed new components, fixed bugs and solved technical challenges with React
- Styled and animated components based on Figma specifications
- Technologies: Web3, React, NX monorepo, Gitlab, Tailwind, Typescript, MongoDB

04/2021 – CURRENT Remote, Iraq
FRONT END DEVELOPER GATEWAY ICT

- Built MyTVAds (Advertising Platform) from zero to live utilizing best practices and responsive design with a mobile-first approach and strategy.
