Strong media and communication professional with an engineering degree focused in mechanical engineering from University of Mosul.

PROJECTS

Weather web app (React JS)

[06/02/2021 – 13/02/2021]

- Provide detailed weather forecasts over a 6 day period updated each day for more than 2000 cities in the world.
- Charts provide wind speed, temperature, humidity and visibility.

Used libraries and dependencies:

- react v17.0.1
- chart.js v2.9.4
- chartjs-plugin-colorschemes v0.4.0
- fontawesome v5.0.7
- bootstrap v4.0.0
- jquery v3.2.1
- ajax v1.12.9

Live Demo: https://weather-app-othman.netlify.app

Code Repo: https://github.com/Othmanosx/weather_app_js

Mood Analyzer (Angular)

[28/01/2021 – Current]

A web app that analyzes human faces and detects changes with emotions depending on the facial expression of image.

Technologies

1. Angular
2. Flask
3. Firebase (for deployment)

Code Repo: https://github.com/Othmanosx/MoodApp

Hangman Game (ReactJS)

[28/01/2021 – 05/02/2021]

Hangman is a word guessing game which I developed using ReactJS Javascript framework in which the user guesses the word generated randomly by the game from an API.

Live Demo: https://hangman-sand-team.netlify.app/

Code Repo: https://github.com/Othmanosx/hangman_react_js

FindYours (in development)

[02/2021 – Current]

The idea of the project is to help people find their missing stuff, will let people post the things they lost and let people post the things they found, every post will contain the info a user may need to contact the person. Every province will have its own section.

1. Technologies and dependencies
2. React js
3. Material UI CSS Framework
4. Firebase
5. Redux
6. Jest testing
7. Prettier
8. Eslint

Repo: https://github.com/murtaja1/find_yours
